

INTRODUCTION TO THRUWAY AUTHORITY WEIGHTED AVERAGE BID PRICE BOOK
English Items Only

This book is based on awarded Thruway contract bid results for the time period indicated on the report. The data is drawn from the TRNS•PORT database.

The selection filter includes items that have pay units of Lump Sum, Fixed Price, and Fixed Price Lump Sum. However, caution should be exercised when using Division-wide statistical data on these items, as they are not always comparable from one contract to another.

The report organizes and displays the data, summarized by item, at both the contract and Division levels. Information displayed at the contract level includes TA number, contract number, awarded contract amount, letting date, bid quantity, minimum and maximum bid, number of bidders, winning unit bid, winning item total and average unit bid.

Information displayed at the Division level includes number of contracts, total number of bidders, total quantity, minimum and maximum bid (using awarded bidders only), Division weighted average unit bid (using all bid occurrences) and awarded weighted average unit bid (using awarded bidders only).

The weighted average unit bids are based on statistical calculations. The object of using a weighted average instead of a normal average is to reduce the influence of outliers and take into account the influence of item quantity on the price.

The Division weighted average bid is a unit price calculated using all bid occurrences. It is calculated by multiplying the average unit bid by the bid quantity for each contract, summing each and dividing by the total quantity. A normal average would simply sum each unit bid price and divide by the number of bidders.

The Awarded weighted average bid price is a unit price calculated using the winning bidders only. It is calculated by multiplying the winning unit bid by the bid quantity for each contract, summing each and dividing by the total quantity.

Printing

Due to the size of the book and the frequency it is updated, it is recommended that the electronic version be used and the whole document not be printed, but only specific pages.
